ColorFlare consumables are manufactured directly for Intec. They offer class leading affordability, providing you with some of the most technically advanced laminate and foils available today, ensuring you the highest quality results on your lithographic and digital prints.

Flaring foils and films - A range of coloured flaring foils and films to add special effects to your print

Intec Flaring Foils and Films

Description Our Premium Flaring Foils, will bond to any toner on the sheet enabling you to add metallic or other special effects to your print - ideal for high quality brochures, wedding stationary, labelling, packaging and so much more. They do not require the surface to be pre-treated and do not require the surface to be laminated. However, if you wish to add spot metallic or holographic effects onto a printed page, then you may need to print your image first, then protect this image with Intec's over printable digital laminate - so you can then over print the area of image that you wish to apply the foil or metallic effect to.

Intec Flaring Foils

Can be over printed after imaging. Can be applied directly to printed image when laminating is not desired - i.e. where you print the metallic parts first - then the sheet can be over printed for the addition of other colours. Alternatively can also be applied to images placed on top of Intec over-printable laminates.

Specification

300 metre roll length
320mm (12.6") width
3" (77mm) core

CFMETGLD

Gold Metallic Flaring Foil

CFMETVT

Violet Metallic Flaring Foil

CFMETSIL

Silver Metallic Flaring Foil

CFMETPK

Pink Metallic Flaring Foil

CFMETRED

Laminates

Intec Standard OPP Laminates

Description

High quality OPP single sided laminating film suitable for litho/offset print and most digitally produced media applications.

Application

Very affordable, yet high quality general purpose laminate for offset prints and light coverage digital prints.

Range stock codes

CFOPPGLOSS25
Gloss 25 micron laminate
CFOPPMATT28
Matt 28 micron laminate

Specification

1,000 metre roll length
315mm (12.4") width
3" (77mm) core

Intec Megabond Digital Laminates

Description

Premium laminating films designed for digital toner based prints. Uses the MegaBond adhesive system which provides a 300% higher bonding strength than standard OPP litho laminating films. MegaBond adhesive also includes proprietary additives designed to penetrate the oils/waxes found in digital toners, ensuring a perfect bond without silvering.

Application

Premium digital print applications where toner based imaging devices are used. Suitable for high coverage toner based prints, available in gloss or matt finishes with varying thicknesses. Use where confidence is required to ensure your bond is firm on digital print and you require a premium finish. Can also be used on litho output

Range stock codes

CFMBGLOSS25
Gloss 25 micron laminate
CFMBGLOSS40
Gloss 40 micron laminate
CFMBMATT28
Matt 28 micron laminate

Specification

1,000 metre roll length
315mm (12.4") width
3" (77mm) core

Intec MegaBond Over-Printable Digital Laminates

Description

High temperature, premium laminating films, that have been coated with a surface treatment that enables a high key over printable surface. Specifically designed for digital toner based prints, uses the MegaBond adhesive system providing a 300% higher bonding strength than standard OPP litho laminating films. MegaBond adhesive also includes proprietary additives designed to penetrate the oils/waxes found in digital toners, ensuring a perfect bond without silvering.

Application

The laminating film of choice for users who wish to add additional effects to full colour digital prints, such as metallic foil or spot UV films. Suitable for high coverage toner based prints, available in a soft touch, silk finish with varying thicknesses. Specifically designed where over printing is required, as the high temperature surface can be reprinted in digital toner based printers.

Range stock codes

CFMBSILK36
36 micron over-printable laminate

Specification

500 metre roll length
315mm (12.4") width
3" (77mm) core

**Description**

Black over-printable laminate

Application

Add an extra touch of luxury to your products by using this velvety matt black laminate for an opaque solid base.
